

School News

Friday 15th May 2020

Hello Everyone,

Once again it has been a busy week for us all. Year 11 students have continued with their exams, Year 10 students enjoyed a geography field trip to Pan am Beach to study wave formation, Year 9 students chose their IGCSE options and Year 3 and 4 students have continued with their humanities project on the Egyptians, showing off some model mummies. On Thursday evening we welcomed a number of local employers to the school to plan a Career Day, scheduled to take place in July. Students will have an opportunity to meet with employers and also to take part in a series of workshops. In advance of next week, the whole school is busy preparing for St Helena Day celebrations due to take place on Thursday 21st May. If anyone has any items which they can lend the school to decorate the hall we would be immensely grateful if they could be loaned to us for the day.

Finally, a reminder that next week is a four day week with a public holiday on Friday.

Happy weekend to everyone,
Farah

Changes to Exam Schedule-Year 11

As a result of some of the exams being arranged in the Public Holidays, we have now re-scheduled as follows:

- ICT Theory Exam – Thursday 21st May and **not** 22nd May.
- Food Exam – 28th May and **not** 1st June

The Exams scheduled for 8th June remain the same.

French Crepes!

In KS3, year 7, 8 and 9 are learning about food and drink and this week have been tantalized by Mrs Crowie’s power point presentation on French crêpes. This leads into our 3rd lesson of the unit, where the students are learning how to talk about their favourite restaurants and how

to order food. House points went to Cohen Roberts, Owen Thomas, Izzy Lutman and Liana Brogdon-Sim for great homework this week.

Year 1&2

This week in Science, Year 1 and 2 have been investigating microhabitats as part of our topic this term. First, we visited Ms Birch in the Science lab to borrow some equipment. We were super envious of all their cool experiments! Then we searched high and low for microhabitats around our school grounds. We found mini beasts lurking beneath rocks, under leaves and in the soil – we even think we found some lizard eggs!

Year 5&6

We had a lovely time reading with Year 1 and 2. Year 5 and 6 helpers go to their classroom twice a week. They help them with any tricky words and they are improving their comprehension skills greatly. We’re looking forward to next week when we will read to them!
