Friday 29th May 2020

Dear Parent and carers,

A warm welcome to our newsletter. This week we would like to share the photos of our St Helena Day celebration. The day was packed full with fun, excitement and a few unexpected surprises. Each class made a great effort to present interesting information all about St Helena, which included information about the history, climate, language, traditions, family history and much much more. The morning culminated with a special lunch of St Helenian cuisine, enjoyed by everyone. A fantastic effort was made by all and we would like to say a huge thank you for your support and for your contributions in enabling us to mark this very special occasion.

This week we have had the dentist visit school and all of our students have had their teeth examined. This was received by our students with a mixture of excitement, apprehension and generated lots of conversations! Thank you to Rob and Jenna for coming to school and for putting our students at ease during the examinations.

On Wednesday we hosted the year 9 Options evening, the aim of this event was to provide support for parents, carers and students in enabling them to

make informed decisions when considering their preferred courses for their IGCSE options. We provided students and parents/carers an overview of the content for each subject and how they will be assessed as an aid to assist them in their decision making.

On Thursday our year 10 students enjoyed another geography field trip to Panam beach where they conducted some river studies using instruments to measure the flow of the river.

Finally, as you know we are planning to host adult education evening classes in September as discussed at the parent/carer information evening and as detailed in The Islander, of last week. If anyone is interested in classes, please let the school know.
