Hello everybody,

Welcome back to the final half term of this academic year. It has been a busy start for our senior school students who are in the midst of their exams. I am exceptionally proud of the dedication and commitment which they have shown. We wish them all the best as they continue next week.

Over the holidays, our school and community library was given a fresh look. There is now a dedicated area for our younger readers, complete with a new suite of inviting furniture where they can relax with their favorite books. There is also an area for adults and older students where they too can relax with a book of choice, a study area and finally we are awaiting the addition of some computers. A huge thank you to our dedicated student librarians, Mrs Grey, Mr Duncan and Mrs Reynolds for giving up their time and for their tremendous efforts to make this into such an inviting resource. Why not come along and browse the books, DVDs and immerse yourself in the lovely atmosphere?

On Tuesday and Thursday evening, we hosted two parent/carer information events on special education needs. The event was informative and focused upon support strategies for home. We were able to support parents by having joined up conversations and some parents took some resources away with them which they can use at home to enable a consistent approach. We will be hosting further information events each half term, please look out for the schedule next academic year.

Finally it has been a day of mixed emotions for us all at Two Boats as we bid farewell to our year 11 students. They have now completed their formal education and say goodbye to school after thirteen years. Our students take with them, many, many amazing memories from their time with us and no doubt some of these experiences will remain with them for life. They also take away plenty of information, advice and guidance as they embark upon their next step. The morning kicked off with an assembly where lots of memories were shared, there were messages from Mr Duncan, from tutor and from myself. We are looking forward to seeing them at the leavers party and we wish them all the very best for a bright future ahead of them.

Farah Quinn  
Head Teacher

In French Year 5 and 6 were learning about the weather and did different activities to help them memorize their new words.

They played 'weather connect 4' where they had to say the correct word and got to put their counters down to make 4 in a row. They also played rounds of 'weather dominoes', by matching the words and pictures together. Finally some of them finished by making weather based fortune tellers.

Year 3 & 4 have been working hard learning their numbers from 1-31. In doing so they have created wonderful pictures of Elmer the Elephant using colour by numbers and code to figure out which colour goes on which numbered square.

Year 8 got involved in a role play situation, to put into practice all their new skills of ordering food from their Food and Drink Unit. They took turns as the shopkeeper and customer, used their knowledge of food and drink, their vocabulary for manners, their questions to ask how much things are, their numbers for pricing and practiced exchanging euros. Well done year 8!

Year 3 and 4 built these fantastic, fearsome robots at the start of their 'Mighty Metals' topic! The children used design technology skills and lots of teamwork to construct their large, freestanding robot figures from recycled materials. Great job!
