

## Our Dinosaur Topic

Last term the children from Foundation Stage embarked on a wonderful topic about Dinosaurs.

A wide range of different activities were completed including finding out about fossils and where they were found in the world and we learnt which dinosaurs were herbivores, carnivores and omnivores. We made dinosaur habitats, dinosaur art work based on aboriginal painting and lots more!

We went on a visit to Dinosaur Rock to bring back all of our dinosaurs to school because they had gone on an adventure. We found them and some dinosaur eggs too! We pretended to be paleontologist for the day and went on a hunt to excavate dinosaur bones. We think we found the bones of a T-rex, a Pterodactyl's wing and even a Velociraptor's tooth!

We all had lots of fun learning about Dinosaurs.
