

Two Boats School

Newsletter

Thursday 28th January 2021

Hello Everyone,

We have reached the end of the second week in Term 2A. Mid-week we welcomed our staff and students back from holiday and isolation. What a great relief it is for both staff and students to be back to full staff. This term we have two new members of staff in the Secondary School: Miss Austwick who is our new Geography teacher (also teaching a small portion of Science and History) and Mrs Millard, our Maths and PSHE teacher. Some of you will no doubt remember Mrs Millard as she has been here before. Both teachers have settled in and met most of their classes. I am sure along with the staff and students you will join me in extending a very warm welcome to them both. I am sure you will hear from them both in due course.

Mrs Maggott

Children Mental Health Week News

Students have been working hard with their teachers again this week on the theme of "Express Yourself" in preparation for next week's assembly on Friday 5th February. Some of the activities taking place involve art work, poetry and prose.

Examples of students work will be included in next week's newsletter.

As a school we are learning the song 'This is me' for a whole school rendition as a part of our assembly. In addition, Friday 5th February will be a non-uniform day and students are encouraged to dress in a way that expresses their uniqueness and individuality. However, it is not compulsory and we do ask that dress is appropriate for school.

On Monday 25th Jan we arranged a visit for our students to view the operations that are in place at the Pier head. It was interesting to see all the changes that were happening in preparation for getting imported stone transferred from ship to shore. We moved on to Command Hill and overlooked the airfield and again were amazed at the various developments going on there. Lots of new vehicles, new structures and loads of container filled materials really indicate that at last our airfield is on its way to being re-built.

Year 7 thinking ahead ...

Do well in school and improve my grades.

Make more friends.
Grow taller!

Improve my writing & write faster!

Concentrate on my grades so that I can go to University.

Work on my swimming to give my house a good chance at winning swimming gala

RESOLUTIONS

Year 7 Science

In Science Year 7 have been studying Forces. In this topic they have spent time learning about different types of forces and their effects. Of course the age old story of how Sir Isaac Newton discovered gravity was told. Lots of fun was had using Newton Meters to measure forces acting on different objects. Watch this space for more Science news.
