

Hello Everyone,

It has certainly been a busy week for all our students with end of year assessments. This is no doubt a stressful time for them but it is an important part of school life. There are only three weeks left of this school year and will end with some fun and enriching activities for all students. Do look out for letters informing you of this with a run-down of what students will be doing. Our Year 10 cohort has just one more week of school and then they leave us for their two-week work experience placements. Thank you to all the employing organisations for supporting this programme, we are truly grateful and know that it does involve your teams going above and beyond.

End of year reports will be out next week for all our students.

On Wednesday 9th July we will have our transition day where the Year 6 students get to spend the day in the Secondary school as a taster for what is to come for them in September. After lunch all primary students will get the opportunity to move up also and join their new class and teacher. I am sure that all the students will have a great day.

This week our youngest students had a visit to the RAF Met Office, read on for more details.

Our annual end of year awards assembly will be held on Friday 11th July at 1.30pm. You should have been contacted if your child is to receive an award; however the assembly is open to all parents. We look forward to seeing many of you there.

House Points

Our house cup was again awarded to Elliots! Great job Elliots!

Our stars of the week were Amber and Zoe in Primary and Cohen in Secondary. Congratulations to all three students!

That's it for now!

Head Teacher

Visit to the Met Office

As part of our Science topic on 'The Weather', the Reception children were fortunate to visit the Met Office at the Airhead to learn about the weather here on Ascension Island.

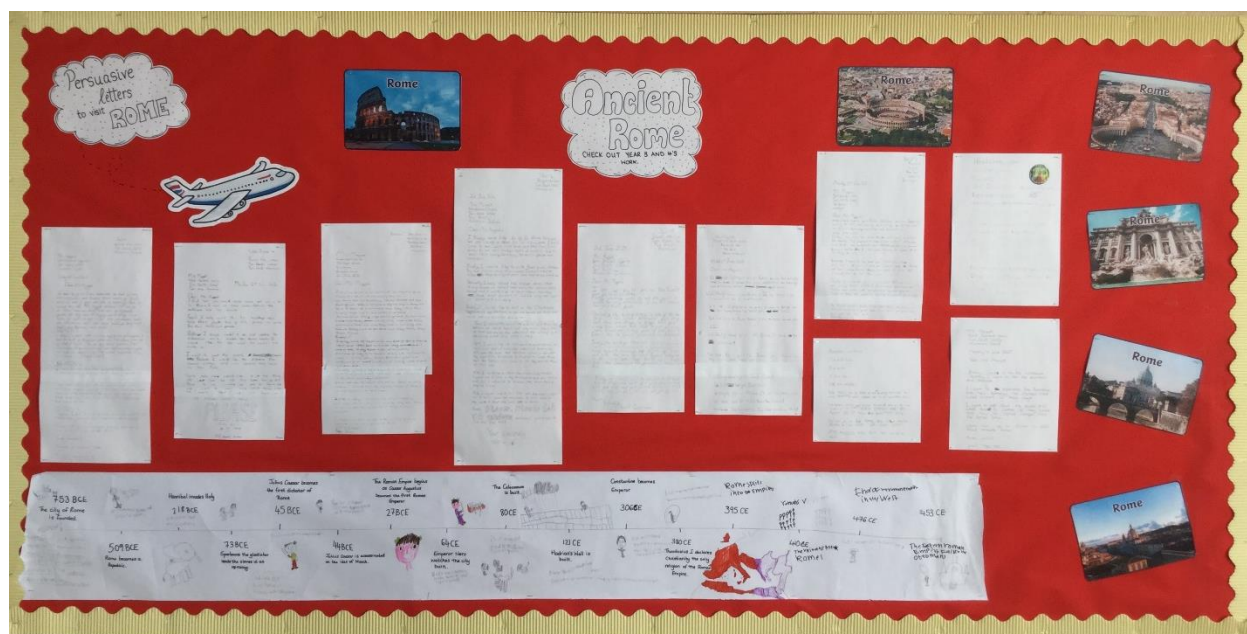

Unfortunately for us, it was raining on our visit, so we couldn't go outside and have a go at the activities Sarah had planned for us. However, she showed us around the office and talked about the monitors that were used to measure the Ascension weather. We saw how much rain was forecast for the rest of the day and night. Sarah also showed us that the next day was going to be sunny...and it was! We saw that there were thunderstorms in the UK and that St. Helena was having very cold weather!

Thank you to the RAF and Sarah for allowing our trip to happen. We had a lovely time!

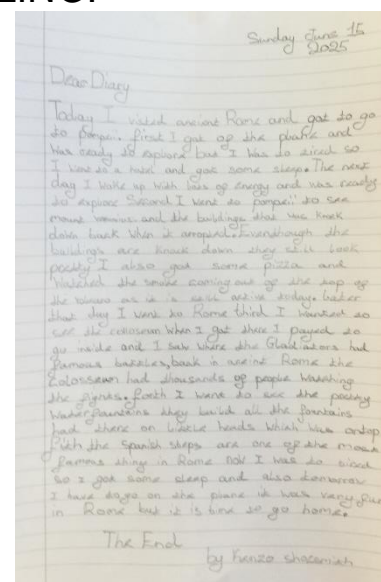

Hello from Year 3/4

Last half term, Year 3 and 4 focused on Ancient Rome and looked at different aspects of this topic. They have shown great understanding and produced some beautiful pieces of work.

For holiday homework, the children were tasked with making a model or creating a piece of writing of their choice to depict the Ancient Rome. Thank you to all the students and parents, who took the time and creativity to make them, they are AMAZING!

Creations of Roman shields.

The Colosseum in Rome
